**Subject:** Strand Master POA-Hurricane Irma Update 11

## The Strand Master Property Owners Association

---

### **THIS IS AN IMPORTANT ANNOUNCEMENT TO ALL STRAND RESIDENTS - Update 11:**

This is Update 11 for Hurricane Irma and its impact to the Strand Community.

1. Our gate contractor was at the Strand today and we can report that the Back Gate is fully operational. Good News !! They are now working on getting all the cameras operational. The Front Gate is fully operational and will be manned as usual.

2. As previously mentioned, now that electrical power and water are back on at the Strand, we still may have "rolling" water outages due to sewage issues. This is because power is not restored to all County lift stations.

We also may experience some rolling electrical power outages for short periods of time due to energizing of electrical lines in other areas.

3. Collier County is continuing to issue news alerts. Please visit their web site at:

<http://www.colliergov.net/>

**Please note that Collier County is still under a conservation of water advisory and that tap water must be boiled before using for cooking or drinking. Once satisfactory results have been received, Collier County will provide written notification.**

A new Hurricane News Release was issued today regarding County yard debris cleanup. We did contact Collier County offices today and they stated that as far as they are aware, the removal of yard and house debris resulting from Hurricane Irma, will include all communities included gated communities. We will follow-up later in the week to inquire about their schedule of debris pickup. If there is any change to this understanding, we will notify everyone immediately. Below is the latest News Release in this regard:

#### **114 - HURRICANE IRMA-RELATED YARD DEBRIS-9/18/17**

"Collier County residents are asked to place all Hurricane Irma-related yard debris curbside in the right-of-way as soon as possible. The right-of-way is the area of residential property that extends from the street to the sidewalk, ditch, utility pole or easement. Do not allow debris to go into drainage swales or driveway culverts since that can create blockages and inhibit drainage.

Place storm-related yard waste in a separate pile. Do not mix yard waste with household trash or construction/demolition debris. Yard waste must be kept in a separate pile. Piles of yard debris mixed with other waste will not be collected. Do NOT put yard waste in bags. Only loose debris will be collected. Keep vegetative debris (woody burnable debris such as limbs, stumps and shrubbery) separated from construction and demolition debris, as it will be collected separately. Only stumps that are fully extracted and placed on the right-of-way will be collected with the vegetative debris Do not put household hazardous waste (paints, solvents, etc.) on the right-of-way. Do not mix normal yard waste with storm-related yard waste; only storm-related debris will be collected.

Residents are reminded to be careful of where they place debris piles. Do not stack or lean debris near or on trees, utility poles, or other structures, including fire hydrants, water meters, or backflow prevention devices as that makes removal difficult and could lead to property damage. If you do not have a sidewalk, ditch or utility easement in front of your house, place the debris at the edge of your property before the curb.

Avoid blocking the road, driveways, sidewalks, mailboxes, water meters, fire hydrants and utility poles.

For more information, call Customer Service at (239) 252-2380."

4. On the County Web Site, you can also find other information about assistance, etc. and important links to helpful information.

With so much damage to much of our community, there are contractors that are around that are offering assistance in repairs to lanais, roofs, etc. One thing in particular that members should be aware is that FEMA has a web page that is called "Hurricane Irma Rumor Control". The link is:

<https://www.fema.gov/hurricane-irma-rumor-control>

There are two helpful articles that are appropriate at this stage of our recovery: "Rumor: Disaster Clean-up and Inspections" and "Scam: Inspections or Contractor Repairs".

5. The Strand Master Web Site that has all past updates and a slide show of some images we have received. These updates are found under the "Emergency Information" tab. Our web site is located at the bottom of this update. Additional photos and videos can be found at the below links. These photo presentations were prepared by Steve Stungis, Arnold Saslavsky and Lisle Anderson (respectively).

<https://1drv.ms/f/s!AgOsiOJpFusrhyJWG25V3gSsToOS>

[https://1drv.ms/f/s!AkIbmPbxNb-ygfQ724xwEPqi-Siq\\_w](https://1drv.ms/f/s!AkIbmPbxNb-ygfQ724xwEPqi-Siq_w)

As we get more pictures and videos, we will upload them to the Strand Master web site or provide an additional link.

As we learn more information, we will update you.

Finally, if you have any additional information about the conditions at the Strand or would like to share any photos of the devastation from Hurricane Irma, please email me directly at: [BobP1426@Comcast.net](mailto:BobP1426@Comcast.net) so we can include any pertinent information in the next update tomorrow.

We pray that everyone remains safe.

Thank you,  
For the Board,

Bob Polizzotto, President  
Strand Master Property Owners Association  
September 18, 2017
